

Wired Controls Part Code Logic – Summary

Part codes are designed to be consistent where possible. This page can be used as a guide for most part codes however subsequent slides explain the main families more closely.

Family	Technology	Daylight Sensing	Control Method	Mounting Type	Mounting Height/IP Rating	Product Type or Feature
SL – SOLO LK - LINK CN - CONNECT	P – PIR M - Microwave	PC – Photocell	H - Switch On/Off Y - Dali	SM – Surface R - Recessed	MB – Mid Bay HB – High Bay # - IP rating if \geq IP55	RU – Relay Unit SIU – Switch Input Unit CM – LCM/LCM connection IPS – Power Supply

e.g. COMDRE → CNMTR → Connect (CN), Microwave (M) Tilting (T), Recessed (R)
 EVH → SLPPCHR → SOLO (SL), PIR (P), Photocell (PC), Switching (H), Recessed (R)

This document is for internal purposes only.

Part Code Logic – Whitecroft CONNECT

Sensors Only

Family	Technology	Daylight	Mounting Type	Mounting Height/IP Rating	Product Type
CN – Whitecroft CONNECT	P – PIR M – Microwave T – Tilting	PC – Photocell	SM – Surface R - Recessed	MB – Mid Bay HB – High Bay # - IP rating > = IP55	RU – Relay Unit SIU – Switch Input Unit D2 – DALI 2 Product

Routers, Controllers and Accessories

Family	Routers & Controllers Only	Scene Plates Only	Other Product Types
CN – Whitecroft CONNECT	Numbers – denote the number of channels on the DALI Router	Number + Colour e.g CNS5W – Connect 5 Button control panel white	Abbreviated accordingly e.g SM – Surface mount box USBINT – USB Interface

Examples

- Old COMDRE → CNMTR → Whitecroft Connect (CN), Microwave (M) Tilting (T), Recessed (R)
- Old COMD2CR → CN2CR → Whitecroft Connect (CN), 2 Channel (2C), Router (R)
- COMDS7W → CNS7W → Whitecroft CONNECT (CN), 2 BUTTON SCENE PLATE (S7), White (W)
