

**WEBINAR INVITATION**

# Whitecroft Academy

Effective implementation of lighting  
technology in sector focused designs

# Welcome to Whitecroft Academy

Our programme of interactive CPD webinars is designed to keep you up to date with the latest sector and technology developments.

Each webinar will provide you with a good understanding of the topic and key learning takeaways for you to apply to your role.

You can either attend the live webinar session or watch the on-demand recording at a later date.

To book your session speak to your **Account Manager** or register your interest on [whitecroftlighting.com](http://whitecroftlighting.com)

## Circular Economy

### Circular Lighting in the Built Environment

This presentation will look at what is circularity, current guidance, what is Cradle to Cradle accreditation systems, and how circular lighting can be delivered in an accessible way.

**This CPD can contribute towards your CIBSE CPD requirement.**

### Whitecroft Vitality - a new approach to circularity

Whitecroft Vitality is a new approach to circularity. It's about delivering an accessible circular solution in the built environment and creating longer term, more sustainable, interconnected partnerships between the supply chain, manufacturer and customer around the product.

## Technology

### Delivering Lighting Excellence

The understanding of the importance of light on our built environment and our influence on us as humans has never been greater, and we see this through changes to our standards and guidance documents. By focusing on our visual, biological and emotional response this presentation will look at how to deliver effective lighting solutions for us.

### Lighting Controls for buildings of the future

As one of the megatrends of the 2020s, the importance of lighting controls in the overall building eco system and user experience will grow. This session will provide details of where the lighting control market is today and provide details on how to specify these systems.

For the designer each sector provides a different set of challenges in order to deliver a lighting solution that is fit for the market and application.

These sector specific presentations will provide you with details around best practice lighting and control solutions looking at the latest guidance documents and research.

All attendees will be issued with a certificate of attendance for their Continuous Professional Development records.

## Sector

### The Healthcare Environment

We will discuss the four key pillars that underpin the lighting proposition for healthcare: Standards & Compliance, Patient & Staff Experience, Infection Control, Energy & Sustainability and how new technology, standards and research may change the way we light healthcare premises of the future.

### Education and the Learning Environment

We will look at the latest research and guidelines, and how lighting and controls will play an increasingly important role in delivering the educational establishments of today and tomorrow.

### The Industrial Lighting Installation

Modern manufacturing and logistics facilities must be safe, low energy, cost effective and support improved productivity. This presentation looks at the bespoke challenges within the industrial sector in delivering a balanced lighting solution that encompasses all of these considerations.

### The Commercial Environment

The introduction of new design approaches such as the "WELL" standard requires adoption of new metrics and brings new expectations of the lighting designer. We will discuss the opportunities LED lighting and smart control technologies provide in delivering tomorrow's workspaces.
