Aim
higher

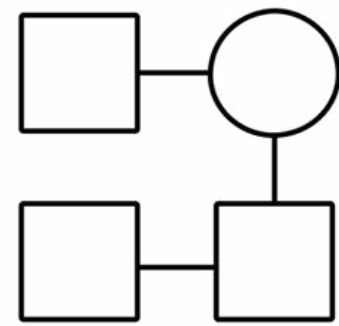

Our five-step custom lighting process

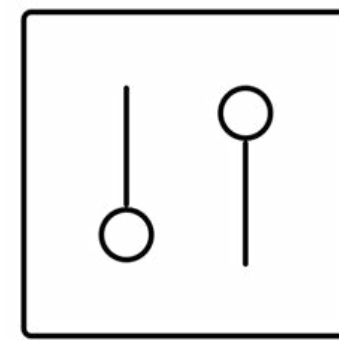

1. Define

We explore your lighting brief, constraints and ambitions.

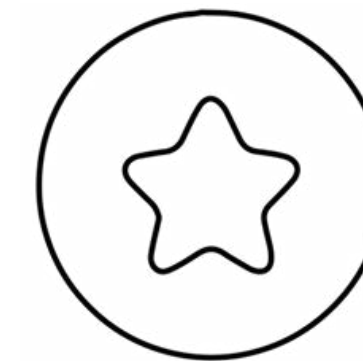

2. Design

Concept sketches and technical validation for your bespoke luminaire or adapted solution.

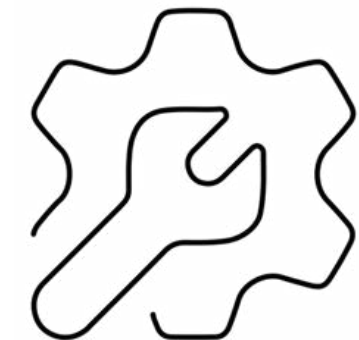

3. Develop

Prototypes, photometric testing and performance refinement.

4. Deliver

UK-based manufacture of your custom lighting solution with full quality assurance.

5. Support

Ongoing technical support and post-installation assistance.

Let's talk

We're always happy to talk through
how we might support you on a project.
