

Geopak™

The reusable packaging solution with GPS location tracking.

We all want less waste. But the truth is, managing recycling on site is a challenge, with costly skips quickly filling with recyclable content like cardboard. The solution is Geopak™.

To Specify Statement

Geopak is a reusable packaging solution equipped with GPS location tracking, designed to eliminate single-use packaging. It utilises geofence technology for seamless asset location and collection. Accompanied by an online app and dashboard, it provides valuable data insights to enhance process planning and improve on-site efficiency - as Whitecroft Lighting Geopak™.

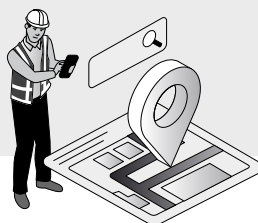

Minimise waste

Because Geopak™ is reusable, minimal single use packaging will arrive on your site.

Boost site efficiency

Geopak™ uses geofence technology so you can easily locate every item on site.

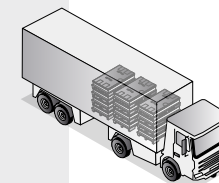

Drive progress through data insights

Single and multi-site dashboards reveal project progress and drive more efficient process planning.

Easy returns

Collapse and stack Geopak™ in a designated zone to automatically trigger a collection notification.
