

Info

- Ease of commissioning with local controls for time delay and lux level adjustment
- Detection range of up to 6m Ø based on 2.5m mounting height
- Recommended mounting height of 1.8m to 3m
- Manual override operation
- 360° coverage
- Supplied with kit for recessing or surface mounting
- Recessed to fit ceiling thickness of 5mm - 20mm
- Off delay of 15 minutes from last observed movement (adjustable from 5 seconds)
- 5 second walk test mode
- Switches up to 6A of lighting;
 - Incandescent / Halogen max 1440W
 - Fluorescent lamp (magnetic) max 500W
 - Fluorescent lamp (electronic ballast) max 400W
 - Low energy compact fluorescent lamp max 120W
 - LED max 110W
- Photocell measures daylight penetration and holds off luminaires if adequate daylight is present
- Finished white
