

command plus COMPLBCLT

small area digital
power supply

The COMPLBCLT Digital Power Supply 'Lite' is a low-cost Bus Power Supply for small buildings, or areas with fewer than 100 devices (e.g. presence detectors).

The COMPLBCLT can accept inputs from ordinary wall switches to manually override presence detectors programmed to zones 1 and/or 2.

- Digital bus power supply
- Powers and synchronises the bus for up to 100 devices
- Operating at 230V
- Power consumption <10W
- Switches up to 10A of lighting

command plus COMPLUBT

universal bus
transceiver

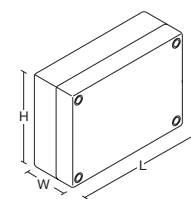

The COMPLUBT Universal Bus Transceiver expands the scope of your controls system by enabling otherwise uncontrolled lighting and non-lighting loads to be brought into the system.

Universal bus transceivers are programmed to respond to signals from the Command Plus bus as part of a zone, common zone and/or building zone and operate in the same way as all of our detectors.

- Enables otherwise uncontrolled lighting and non lighting loads to be brought into a controls system
- Transmits and receives signals to and from the bus
- A boxed enclosure
- Operating voltage 230V 50Hz
- Maximum of 20 DALI ballast load
- Programmed via COMAP (supplied separately)
- Switches up to 10A of lighting
