

concert starline flex RGB

flexible colour change
adhesive LED strip

Optics

- Total power consumption including driver is 67W
- 50,000 hr life expectancy
- Each LED contains red, green and blue emitters

Body

- Linear separable LED strip on flexible printed circuit board with self-adhesive back
- The strip features a high performing adhesive that can be bonded to a variety of surfaces
- For optimum adhesion, installation on a metal heatsink is recommended
- 4m length reel
- Can be cut in 100mm intervals
- Either 10mm or 150mm connectors available to connect strips together

Control

- 60W driver and control unit with integrated RGB sequencer for up to 4 different sequences and 16 scenes*
- Up to 16 60W drivers can be linked together using Y Connectors (supplied separately)
- If more than 16 linked drivers are required a System Coupler can be used (supplied separately)
- Ceiling mounted infra-red receiver can be used in conjunction with the handheld remote control to switch between sequences and scenes. One receiver and one remote can control an entire system
- Push button coupler to enable controlling of the strips via a retractive switch mounted on the wall (Y Connector Screw Lead must be used with Push Button Coupler)

* The 60W driver will power a maximum length of 3m of Concert Starline Flex RGB.
