Downlighters: Attachments for mirage downlighters MD20 and MD24

MDA20-43

MDA20-62

MDA20-61

MDA20-47

MDA20-40

MOTIVATION

A comprehensive range of simple to fix attachments designed specifically for the popular MD20 and MD24 Mirage downlights. The attachments allow the standard products to be used for even more innovative ways adding life and interest to the ceiling.

Technical Louvre

The technical louvre optimises lighting efficiency whilst minimising glare. When added to the diamond faceted standard Mirage downlighter the louvre brings the luminaire into full compliance with LG3 Cat 2 and DIN 5035 60°.

Glass Ring

The simple addition of suspended glass ring attachments brings Mirage the extra benefits of colour, texture, shape and focus. It also reflects light back onto the ceiling adding life to the ceiling area around the downlight. A comprehensive range of patterns and colours are available to maximise creative effects.
