

Surface: IP65 perimeter security lighting bulkhead

Custodian

MOTIVATION

Designed to provide economical perimeter security lighting whilst offering a contemporary design over the traditional square brick bulkhead. A curved refractor controls light output reducing glare and upward light pollution while concentrating light downwards, sideways and forwards to maximise the spacing between luminaires.

APPLICATION

- Security lighting
- Building perimeters
- Walkways and paths
- Car parks
- Subways and tunnels
- Industrial storage areas

SPECIFICATION

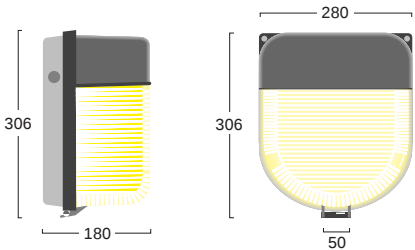

- High pressure sodium, Mercury or popular 2D lamp options
- IP65 protection
- Back housing: moulded GRP
- Refractor: UV stabilised polycarbonate
- Hinged refractor for ease of lamp change
- Through wiring via two side cable entries
- Single back cable entry point
- Cable entry glade supplied
- Black finish
- Integral maintained emergency option – 28W 2D version
- Integral photocell option
- Supplied with lamp

Thames Valley Athletics Centre

- 1 GRP body
