

Millennium Dome

MOTIVATION

Spectacular buildings demand exceptional lighting solutions. The Millennium Dome's lighting design team, Speirs & Major, concluded the Sportsliter from Whitecroft provided that solution.

288 of these floodlights have been installed on the roofs of six, four storey buildings strategically positioned to project light to the underside of the Dome's structural canopy. In addition one metre long anti-glare cowls have been applied to the front of the Sportsliters to prevent light pollution or glare across the vast expanse of the Dome's interior.

APPLICATION

- Floodlighting open spaces and architecture
- Sports stadia
- Sports facilities

SPECIFICATION

- 1000W universal burning metal halide lamps
 - Integral gear boxes
 - Narrow and wide beam reflectors
 - Blue filter glasses
 - 1m glare cowls
 - Concentric louvres
- **Quantity supplied**
288
