

BT

MOTIVATION

T5 technology was the driver behind the lighting specification for British Telecom's flagship building 'Atlantic Quay' in Glasgow. Occupied by 1400 BT personnel on five floors, this state of the art building has its interior illuminated by a customised 750mm square version of Whitecrofts' Javelin recessed luminaire. Javelin couples high levels of illumination and the precise control of light distribution with energy conservation.

APPLICATION

- Commercial offices
- Retail stores

SPECIFICATION

- Lamp option:
 - 3 x 14W T5 (4000k)
- High frequency control gear
