

Derisk your installation

Our plan right service provides you with pre-to-post project support. Full technical drawings, wiring schematics and detailed step-by-step instructions remove complexity and give your teams complete confidence in achieving a right-first-time install.

Comprehensive Design Support

Professional installation-ready drawings (DWG & PDF) tailored for smooth implementation.

End-to-End Technical Assistance

Expert guidance throughout the project to ensure accuracy and efficiency.

Enhanced Digital Support

Quick resolution of technical queries with advanced digital resources.

Installer-Focused Drawings

Custom layouts designed for ease of installation and facilities management.

Clear Wiring & Connectivity Details

Includes modular wiring layouts, DALI subnet demarcations, third-party interfacing, and application-specific schematics.

Optimised Control & Switching Solutions

Covers all Whitecroft product switching options (PTM, centre point, wireless, etc.).

Precision & Quality Assurance

Final technical checks, systematic block diagrams, and treatment drawings for best application.

Flexible Revisions & Customization

Site-specific adjustments and commissioned parameters available as needed.
