CPDs from Whitecroft

CIBSE accredited CPDs

Designing for Low Carbon vs Low Energy

Explore how LED lighting, driven by market forces and legislation, has matured through energy savings but must now evolve beyond efficiency to a whole-life, low-carbon approach.

Relighting Spaces in the Built Environment

With 80% of the built environment already in place, this presentation explores how to optimise existing assets for low-carbon lighting without compromising human needs.

Circular Lighting in the Built Environment

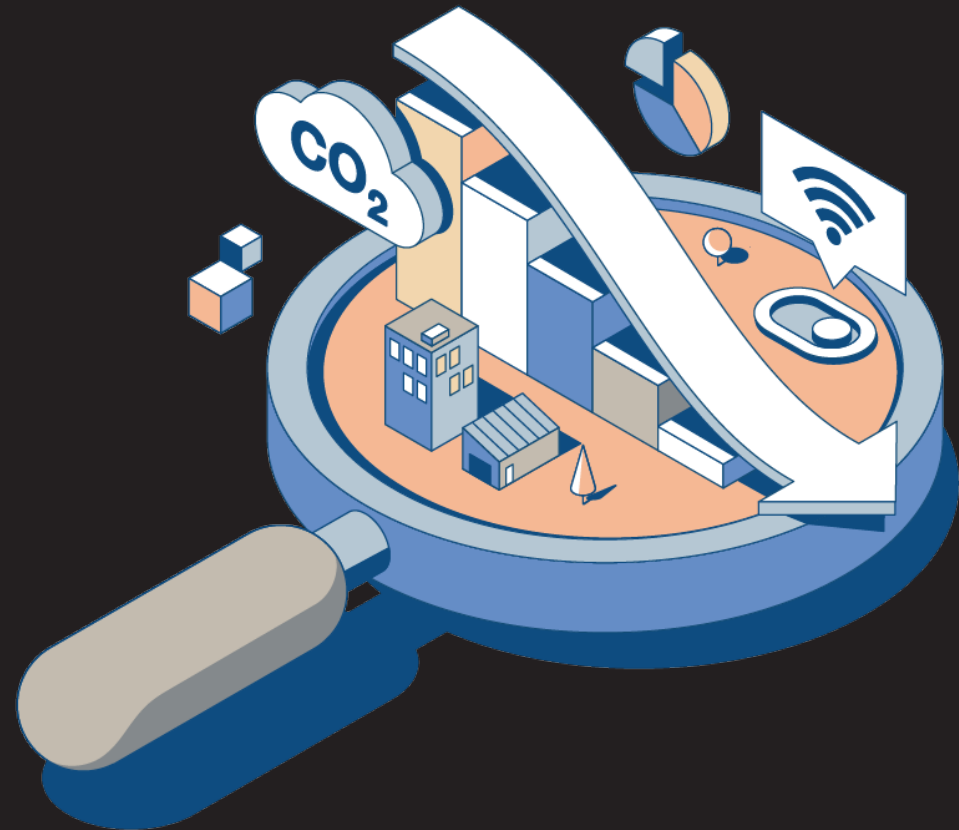

How circular lighting balances economic, environmental, and social needs, following global targets and Cradle to Cradle principles for accessible sustainability.

personalised training content.

As individuals and businesses working within construction, it is our responsibility to stay up to date with the latest regulations, technology and market trends.

Delivered face to face or online, our series of CPDs has been created by leading industry professionals, providing you with the latest insights into the built environment.

In addition to our CIBSE accredited range of CPDs, Whitecroft offer a wide range of CPDs linked to solutions, health and wellbeing, standards and our key sectors.

Book your CPD or request personalised training content.

Whitecroft Vitality – with the growth and importance of tackling climate change and achieving net zero, find out how our actions can help you meet yours and your project needs.

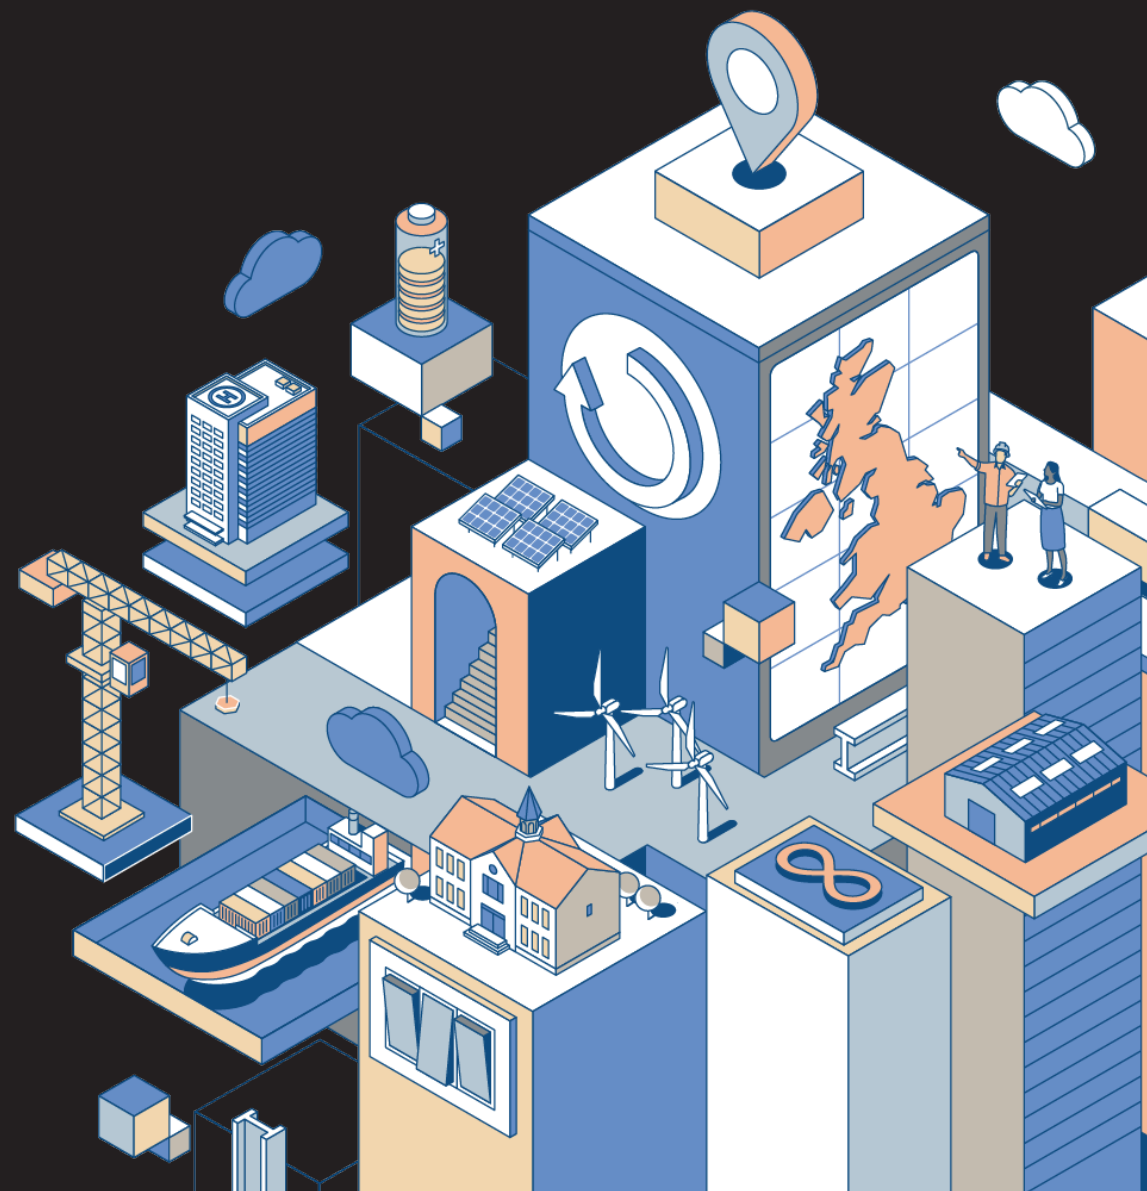

The WELL Standard - Whitecroft are one of two businesses in the UK advising the WELL light concept. This presentation will give you an overview of the latest version of the WELL Standard and how this delivers people focused workspaces.

The Healthcare Sector - leaning on our 4 key pillars for healthcare, this presentation will provide an insight how to deliver effective lighting solutions for the healthcare sector.

The Learning Environment - lighting plays a key role in delivering spaces that can inspire, motivate and support the learning of all. This CPD will explore how to deliver effective lighting solutions that look to the today and the future.

Emergency Lighting – with a growing emphasis on building safety, learn more about the fundamentals behind current and future guidance and future technological advances that can ensure the safety of occupants.

Smart lighting – one of the new 'buzz' words in our industry, but what does this mean? This insightful presentation will explore what smart lighting means, the reasons for considering smart and how smart controls can deliver solutions that consider all aspects of sustainability – People, Planet and Profit.

Bright futures academy

Whitecroft Lighting's Bright Futures Academy offers hands-on experiences in lighting design and manufacturing.

We team up with our partners and provide placements to young talent in their supply chains, sharing expertise and forging career-long relationships.

Visit Whitecroft

Our 13,100sq/m manufacturing facility enables us to produce 97% of our luminaires at our Ashton-under-Lyne, UK head office, where we control all aspects of design, testing, manufacture, and distribution.

"I found the overview of the manufacturing process really interesting, it was good to see the combination of automation and hand-finished products, especially all being in the UK.

The insight into the lab testing processes was fascinating, and the presentations were usefully targeted at our key points for upcoming projects and delivered by knowledgeable presenters.

It was also good to get the background on the steps Whitecroft were taking for lifecycle assessments, retrofitting and actual implementation of circular principles. All things that will be getting more and more prominent going forward.

It was a well curated day and well worth the trip."
