

CityEdge

Performance and compliance

CityEdge. Performance and compliance

CityEdge brings the latest edge-lit LED luminaire technology to the office environment. Delivering excellent uniformity and glare control with minimum energy, CityEdge combines compliance with high performance. A range of features mean that it can meet the most demanding requirements, with optional Organic Response[®] or Dali dimming control, integral emergency options and compatibility with a wide range of ceiling systems.

Comfort and compliance

CityEdge has been designed with the specific needs of today's office in mind. The quadraprism diffuser delivers glare-free, uniform illumination throughout the lit space, with excellent cylindrical illuminance characteristics. A choice of light engines means that any target illumination level can be achieved, without compromising the lighting design and with a minimum of installed points. These features make CityEdge the perfect choice for compliance to LG7 and EN12464.

Lowering energy consumption

Latest generation LED technology combined with highly efficient optics maximise energy savings to deliver a low energy workplace lighting solution. Optional integrated Organic Response[®] wireless control with autonomous operation across multiple spaces offers further cost savings on the install and running costs. With efficacies of up to 111 lm/cw, CityEdge supports compliance to ECA and to LEED and BREEAM certification for sustainable buildings.

Ceiling integration

Whatever ceiling system is specified, CityEdge offers complete compatibility. The unique design of CityEdge means that it will sit perfectly into a wide range of ceiling types, giving a completely integrated appearance and ensuring quick and simple installation. The White RAL9010 paint finish further enhances the finished appearance, giving a seamless transition between ceiling grid and luminaire.
