

Installation Instruction

1

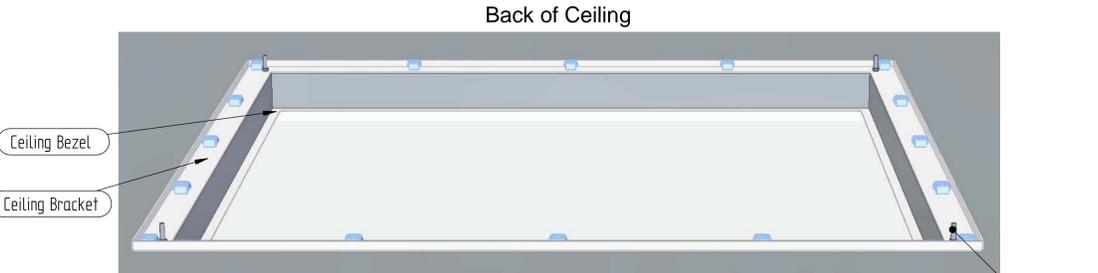

Step 1 - Hold the ceiling bracket (the piece with the caged nuts) up to the ceiling, in the required mounting position and secure in place with 4 screws in the small corner holes then mark out the inner aperture (588 X 588mm +3/-0) and 16 bezel holes through the caged nuts. This installation is considered a two man operation.

2

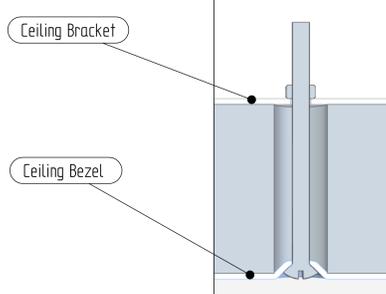

Step 2 - Remove the ceiling bezel and 4 screws. Drill the 16 marked and 4 screw holes with a 10mm drill bit. Then cut the aperture for the fitting using the marked out lines. Ensure that the holes are drilled vertically as they need to align with the ceiling bracket cagenuts. (Cover kit will only work with 40mm Maximum Ceiling Thickness)

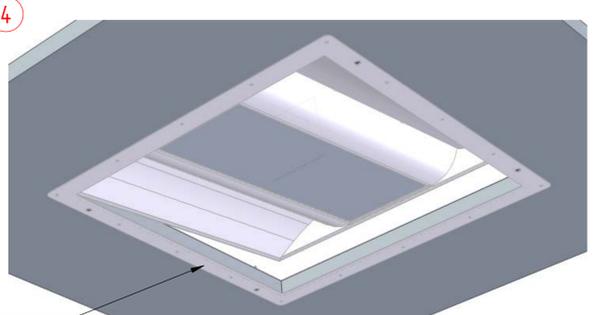

3

Step 3 - Place the ceiling bracket into void and place it around the cut aperture. Then nut and bolt the ceiling bezel with dimples facing in the holes, these can be finger tight.

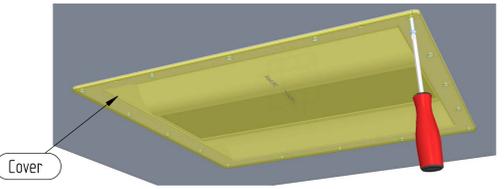

4

Step 4 - Lift and tilt the 600x600 fitting into the void and then place on the holding bezel .

5

Step 5 - Remove film from both side of cover. Make sure the counterbores for the screws are facing down. Then Screw the cover to the ceiling bracket with the 16 anti-tamper screws supplied. Engage the screws first by hand ensuring the caged nuts are not dislodged. Ensuring that screws are sufficiently torqued to 2Nm. (Security Allen key or Bit required, sold separatly HAL-KEY or a 4mm security hex key)

SPECIFICATION

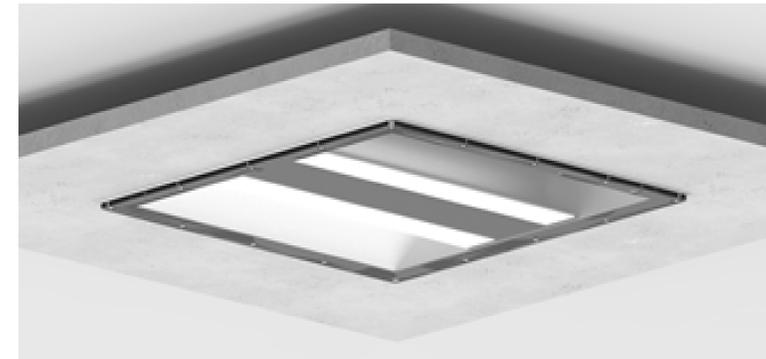

Finish	RAL 9003
Materials	Polycarbonate / Steel
Weight	5.0 Kg
Ingress protection	IP40
Anti Ligature Rating	IK10
Void Depth	The minimum void depth can be attained from the installation leaflet of the 600x600 product that is been fitted.
Sensors	Organic Response 3 sensor should not be used on this product.
Fittings	See website for product compatibility.
